

## **10-23-17 Picturing it**

If you've ever been shopping for furniture but couldn't decide how a couch or a table would look in your home, there's now an app that can help.

It's called Modsy, and it can create a 3D rendering of your space, then show you how something new would fit in. It works for shopping online, too. Seeing your home with the new furniture at scale removes a lot of the guesswork.

Which makes me think: What if there was a way to see how a life decision we make today would impact our future? Decisions like jobs and relationships, and even simpler things like generosity and compliments we give others.

Well, there's no app for that because the future isn't fixed in place like our furniture. But we've always had some powerful tools: prayer, faith in God, and hope for tomorrow.

Just a thought. I'm Sid Batts from First Presbyterian Church in downtown Greensboro, overlooking Fisher Park.
