How to watch our church service online:

1. On an Internet-connected computer, open a Web browser such as Internet Explorer, Mozilla Firefox or Google Chrome. If you're using a Mac or an iPad, Safari will work just as well.
2. Type the following address in the address bar at the top of the browser: www.fpcgreensboro.org/streaming-live.
3. You should see a TV-like screen on this page with a triangular-shaped play button. If not, make sure you typed the address in step 2 correctly.
4. Click on the play button. If it is between 10:35 am and noon (approximately) on a Sunday, this will give you access to the church's 10:45 am Sanctuary service. At any other time during the week, you will see the most recent Sunday's service. In this case, you will need to click the play button a second time.

Additional options:

5. To fill your computer or tablet's screen with the service, click on the "Full Screen" icon in the bottom-right corner of the window that is playing the service. To return to the smaller version, hit the "escape" button on your keyboard, or click on the "Full Screen" icon again.
6. To control the volume, click on the speaker icon near the bottom-left corner of the window that is playing the service. Use the slider to increase or decrease the volume. If the volume is up but you still cannot hear, check your computer's master volume and make sure your external speakers are turned on and that their volume is set correctly.

Other notes:

If for some reason the church's Web site is down, you can still see the service by typing this link into your browser's address bar: www.livestream.com/fpcgreensboro.

If neither this link nor the link in step 2 above works, re-check for accurate typing and then double-check whether your computer or tablet is online. If you are having trouble getting online, please check with your community's staff.
